

Vijay Engineering & Machinery Co. bagged an order of INR 12.25 million from Offshore Infrastructure Limited for the project of Blantyre Water Board based in Malawi, Africa.

Vijay Engineering & Machinery Co. supplied 22 electric pumps of various duty parameters as per their requirement. The pumps supplied were of Kirloskar Make RKB, DSM, UP series.

The project was received under stiff competitions .The whole team of KBL and VEMCO had worked closely with the PED team at the plant to ensure that right sizing of the product and accurate solutions is given to the client .

Offshore at the same time has shown great confidence in VEMCO to execute and partner them commissioning the system.

VEMC will be assisting Offshore Infrastructure Limited in commissioning and testing of the pumping system in Malawi, Africa.
