

ANALOG CONTROL PANEL

VEMC analog control panels control variables related to application and work on integrated electronic circuit and provide an analog display of various parameters.

Application:

- Tank to tank transfer
- Dewatering
- Borewell/Openwell submersible

Standard Specification:

- Operation based on electronic module
- Multiple operating modes
- Available in range of 0.5 to 400 HP
- Switch gear from reputed make like L&T/Schneider/BCH
- Motor protection against various failures
- IP42 as standard and IP52/IP54/IP55 as optional
